# SPECIAL FEATURE OF THE 76th ONE SHOT ANTELOPE HUNT

## From the Desk of Don Kennedy Past Shooters President

Greetings to all Past Shooters:

I am excited to serve as President of the Past Shooters, and hope that with the help of the One Shot Hunt Board we can continue to provide and improve the One Shot Hunt.

Thanks to Dick Gray, Past President and Erica Flom, Executive Director, and Past Executive Vice-President, Rick Fagnant, as well as several other Board Members, a great number of significant improvements have been instituted to improve the operations of the Past Shooters office. Many thanks to them.

This year the Foo-Foo-Rah will be held again at the Old Baldy Club, the dates are June 8 through 11, 2017.

On October 28, 2016, the Executive Committee (John Shipper 1<sup>st</sup> Vice President, Alan Pettersen, President Water for Wildlife, George Petty, Secretary-Treasurer) traveled to Lander for a meeting with the Hunt Board. We had a very constructive meeting and hopefully resolved several issues. The Thursday night banquet will be catered again by the Wyoming Catholic College, who did a superb job this year. I believe that the Hunt Board's President Paul Fontaine and I will have a good working relationship over the next two years.

The executive committee also met with Scott Harnsberger, who has accepted the position of Executive Vice President. Scott is a long time member and past President of the Hunt Board so he will bring a wealth of experience and knowledge to our Board. The Past Shooters Board are pleased that he has accepted.

I am also pleased to announce that the Past Shooters and the Water for Wildlife Boards are going to move forward with expansion of the Museum and additional office space when the rental space is vacated in May.

Warning to all perspective new teams, the Hunt Board has several submittals for new teams in hand and they are anticipating having team selections soon.

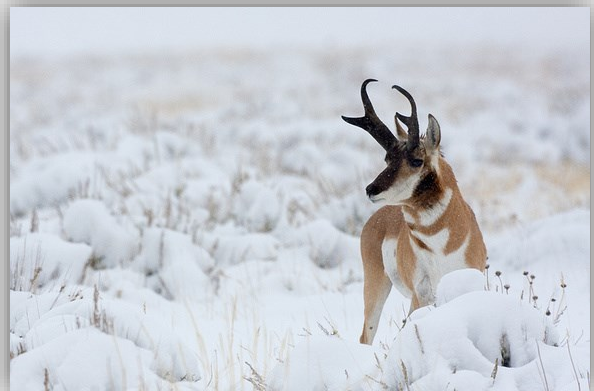

To the 2016 *new* shooters who are now Past Shooters, we thank you for your support in joining the Past Shooters. We encourage all Past Shooters to become active in supporting the hunt and the best way is to attend the Foo-Foo-Rah in June. This is when most of the business is conducted, however it is not all business. We try to make it an enjoyable time for all members and spouses, as well as an opportunity to meet other members.

Thanks to all of you for this opportunity to serve as your President.

See you in June..

*Don C. Kennedy*

## From the Desk of Alan Pettersen Water for Wildlife President

Hello Past Shooters and Friends,

I appreciate the opportunity of becoming president of the Water for Wildlife Foundation (WFWF). I consider it a privilege to take on the task of leading this unique, premier conservation organization. I would like to express my thanks to Jay Sandler for all he has accomplished in moving our organization forward during his two years as president of WFWF, and his 17 years as an active member of the Past Shooters. Keep it up Jay!

I look forward to working with both the One Shot Hunt Club and the One Shot Past Shooters' Club to continue the great traditions of the Hunt and the camaraderie that emanates from our Past Shooters. With the talent and enthusiasm in our groups, I see a bright, thriving future in our Foundation's continued development; especially in our ability to make more inroads in providing water where it is needed.

Our revised by-laws are in place and our new WFWF branding is being advertised throughout our network. As part of these changes the new board of directors for the WFWF has been approved with directors now serving two year, staggered terms noted as Class B and C directors. A list of our officers and directors appears later. Thank you to all who accepted nominations and I look forward to working with you as we tackle WFWF initiatives. Our monthly WFWF board conference calls will continue and a schedule is forthcoming.

The 2016 Hunt was a great success due to the hard work of many dedicated volunteers from the Hunt Club, the Past Shooters Club, the Lander community, the Shoshone Indian tribe and others. Bravo to all those who made it happen. Our auctions and grant funding did well and we are set up nicely for a great year of water project funding. As we all look forward in our end of year gift giving planning please remember the Water for Wildlife Foundation and our educational programs.

The Intern program has proven to be a great success and we plan to continue this initiative next year. These young adults are proving to be talented and anxious to learn, while also providing WFWF and our partner, Wyoming Game & Fish, with a lot of added value. If you are looking for a great return on a donation just indicate "intern program" and it will help us fund the program which has a annual cost of \$15,000 for two junior/senior students working in Wyoming during their summer.

If you have any input, concerns, suggestions or questions about the Water for Wildlife Foundation please email ([alan.pettersen@att.net](mailto:alan.pettersen@att.net)) or call me anytime (972.740.90938). Water for Wildlife is your organization, let's continue to grow our conservation footprint together.

As we move towards this holiday season enjoy your time with family and friends and have a memorable holiday. Please take a moment to remember our military men and women who are serving away from home during this period.

Sincerely,

*Alan Pettersen*

Alan Pettersen  
President Water for Wildlife Foundation

## From the Desk of Scott Harnsberger Executive Vice President

By way of introduction, my name is Scott Harnsberger, your newly appointed Executive Vice-President of the One Shot Past Shooters Club, I was selected as the Lander shooter on the 2005 Wyoming Team. As past president, long term board member, and volunteer for the Lander Hunt Club I hope to lean on that experience to enhance the operations of the Past Shooters and the Water for Wildlife organizations.

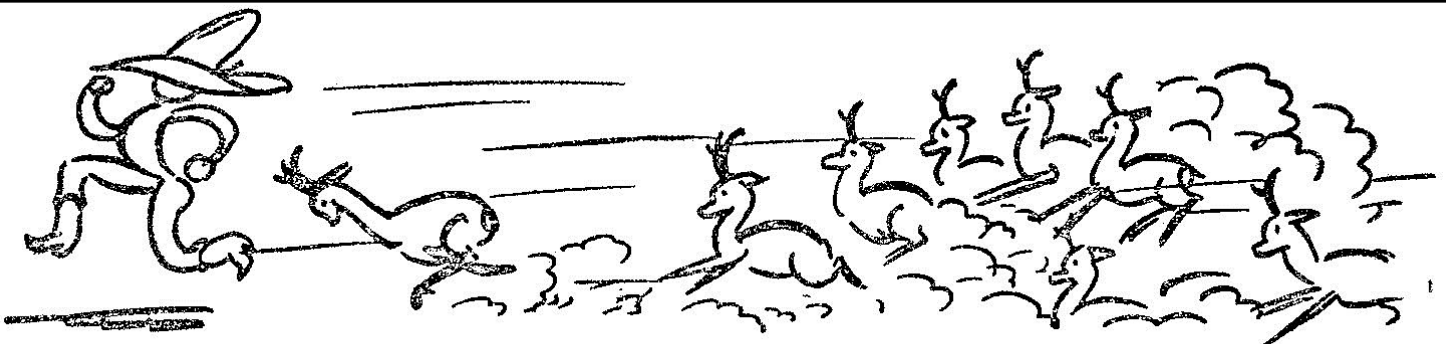

Over the last 25 years I have served as the Fremont County Treasurer. My wife Teddi and I live just north of Lander neighboring the former ranch of Jack Scarlett. I enjoy backpacking in the Wind River Mountains and am an avid fly fisher. I am a Lander native and a sixth-generation resident of Fremont County. My Grandfather Harry Harnsberger penned the Legend of the Hunt and was the master of ceremonies at numerous hunts back in the 1940's, thus I have a personal interest in carrying on the traditions and expectations of the Hunt.

I am honored to serve as your Executive VP. If you have any question or concerns about the operations of the local office or the efforts of both organizations, please contact me at your convenience my email address is: [goppoke@gmail.com](mailto:goppoke@gmail.com) I will do my best to answer your questions or address your concerns.

Regards,

*Scott Harnsberger*

# Water for Wildlife Foundation

*Lander, Wyoming*

The Water for Wildlife Foundation (WFWF) works to preserve and protect both habitat and wildlife in areas lacking the most vital resource of all – water. Starting in 1975, water development projects were completed primarily for the benefit of Pronghorn antelope in the western United States. Over the last two decades, the program and projects completed have expanded to include projects benefiting not only Pronghorn antelope, but all big game species, upland game birds, waterfowl, and numerous non-game species of mammals and birds. From Kansas to California, WFWF has helped provide supplemental water resources for wildlife in twelve western states to date.

Wildlife have been known to expand their ranges into previously unoccupied habitats once water has been developed. Across the West, native species and their habitats have been adversely affected by drought. Annual precipitation in some of the arid portions of the West may be less than 6". By providing permanent and reliable supplemental water sources, Water for Wildlife has improved seasonal and year-round habitats for wildlife. Provide water and wildlife will come. Types of projects include guzzlers, springs, wetlands, conversions to solar wells, etc. Each water project is uniquely designed to take maximum advantage of location, conditions, and topography.

One of the keys to success is the close cooperation with state game and fish departments, the Bureau of Land Management, other state and federal agencies, and other non-profit conservation groups to ensure the proper placement and design of projects to achieve maximum benefit. These agencies and organizations, with the help of wildlife biologists and other natural resource professionals, have assisted Water for Wildlife in the development of over 450 supplemental water sources throughout the West. Through the careful placement, management and maintenance of water developments, WFWF has helped hundreds of different wild species thrive in arid western landscapes. Bighorn sheep and the Greater Sage-grouse are two iconic western species that Water for Wildlife projects have specifically benefitted.

The Water for Wildlife Foundation is committed to playing a pivotal role in the conservation of wildlife through the development of water resources. WFWF helps bridge the gaps between agencies and other partners to implement projects. Water for Wildlife projects should have at least a 1:1 funding match. Projects are ranked, and funding is approved based on benefits to area wildlife, need for water, cost effectiveness, cost-share partners identified, and public benefit. This project funding range can and often does vary from project to project. This is not limited to, nor does it ensure previous WFWF grant funding approval amounts. The Foundation is encouraging your agency or organization to partner with us to support our efforts of making water as accessible to wildlife as possible.

Please contact our office for a WFWF Project Proposal Application.  
Application deadline: January 31, 2017  
Notice of approval by March 2017

## From the Desk of Erica Flom Executive Director PSC & WFWF

Dear Past Shooters,

I would like to take a moment to thank the previous board of directors and officers and Past Presidents - Dick Gray and Jay Sandler, and Executive Vice President, Rick Fagnant for the pleasure and privilege of working with you over the past year. I will miss working directly with you! To the new incoming Presidents and board of directors, I look forward to the future opportunities for WFWF and to working successfully with you during the next two years.

Focus on the upcoming fiscal year involves creating a solid budget for both the Past Shooters and Water for Wildlife Foundation this is crucial for forward momentum. Establishing short and long term goals that are obtainable, successful, and are developed with support and commitment between both boards is paramount. There are many new developments from museum expansion, grant deadline changes, staffing, fundraising plans along with our intern program and usual business, that I have high expectations for 2017. Great achievements require time, energy, appropriate staffing, proactive boards, communication, and necessary funding. To accomplish the extraordinary requires bringing all these resources together.

The 2016 One Shot Antelope Hunt was full of excitement this year! The weather was absolutely beautiful (which can change on a dime) in Wyoming. The Thursday evening Past Shooters banquet I've heard nothing but rave reviews. In conjunction to the usual activities during the One Shot week (sight-in, shooting competitions, hunting, banquets, board meetings, ladies activities, license issuance), there were two successful water project tours one located out past Muddy Gap and the other near South Pass (see pictures on page 27-28). Water for Wildlife dedicated 13 water projects at the 2016 Past Shooters' Banquet. The live auction raised record numbers and 6 additional water projects were auctioned off! Thank you for the encouragement, bidding, financial support, and commitment toward conservation to those of you who participated! What a hoot! I am pleased to say since the One Shot, two additional WFW water projects have been sponsored! It is the magic of your involvement that leads WFW to success. The opportunities never looked brighter.

Thank you - to the numerous volunteers, Hunt Club, guides, greeters, G&F, and staff for all of the support over the course of the past year. I would like to extend a special thank you to Randi Arpan, Rebecca Burton, Alex Hogan, Buddy DuVall (WSF), Stan Harter (WG&F), Jason Hunter (WG&F), Jerry Galles (WWSF), Tony Caligiuri (Boyt Harness Co.), Kelli Thornton (Sitka Gear), and numerous volunteers for their countless hours of hard work. Thank you!

For those of you who hold the new 2016 trophy titles which were earned via silhouette, hunting, or clay shooting abilities, great job and congratulations! Your competitive nature is an important part of the fun, and gives everyone a good target to try and beat next year! (see photos on pg. 18)

Congratulations and welcome to all of the *New* Past Shooters. I hope it was everything you were anticipating and more! I trust you will embrace the long standing traditions and want to return as Past Shooters. Your commitment and support to the One Shot, Past Shooters Club, and Water for Wildlife is expected.

There are over 30 million men and women in this country who serve on the board of a nonprofit organization, just like ours. As a member, director, officer, you are charged with keeping the fate and fortune of the Water for Wildlife Foundation alive and well. You are the future. That's an awesome responsibility! Together we can make it happen.

Kind regards,

*Erica Flom*

Erica Flom  
Executive Director  
Water for Wildlife Foundation & One Shot Past Shooters

# WFW Project Update

Species Benefiting:		
Bobcat	Fish	Pheasants
Badger	Fox	Pigeon
Blue Grouse	Hungarian Partridge	Quail

 Wyoming Ranch Co.

### Projects are developed from many different water sources:

- Placing solar powered pumps on existing wells
- Improving natural springs or artesian wells through the construction of underground storage facilities
- Construction of guzzlers to trap and store available water from snowmelt and rain
- Restoration of slough and marsh habitats
- Stock tank overflow pond construction or reconstruction
- Improving wildlife vegetation around pre-existing water sources
- Water discovered by energy companies while drilling for resources

*"Water is the driving force of all nature."*  
*-Leonardo da Vinci*

## From the desk Ryan Amundson WFW Statewide Game & Fish Habitat Biologist

Past Shooters,

Summer 2016 was a busy one for me as I traveled throughout the state coordinating with Wyoming Game and Fish Department (WGFD) personnel and our many conservation partners. I spent many days completing habitat assessments for mule deer in southeast Wyoming, looking at summer, transition, and winter ranges on foot and horseback. Several Water For Wildlife sponsored water development projects were initiated or completed in Wyoming, including Elk Mountain Guzzlers (WY / SD border), Mormon Handcart Ranch well and tank, Seminole Mountain Guzzler, and Ruby Knolls well, solar pump, and tank. All of these projects will provide immediate benefit to wildlife including pronghorn, bighorn sheep, sage grouse, and mule deer. Water For Wildlife continues to play an integral role in project administration and providing seed money to get these projects completed!

Unfortunately, I missed the One Shot Hunt and associated meetings and tours this year. I trust that everyone had a great time again. Fortunately, the reason I missed the events was due to the fact that the hunting gods were kind enough to provide the Amundson family with some once-in-a-lifetime licenses for 2016. My 19 year old daughter, Sierra, drew a Snowy Range / Wyoming moose license, with drawing odds of 1 / 650. We scouted every weekend in August, and hunted 16 days in

September. Sierra harvested a 161" B&C record book bull with her bow, her first archery kill. I called the rutting bull into a distance of 20 yards, and Sierra made a great shot. We enjoyed the father/daughter time together and both made many sacrifices to get it done. It was time in the woods that won't soon be forgotten. I made my annual trek to the Wind River Mountains above Pinedale in early October to hunt elk in the Jim Bridger Wilderness. Again, hunting gods were smiling down on me, and I harvested a beautiful 6x6 bull and my hunting partner also killed his first moose. The Wind Rivers are a spectacular mountain range and my breath is taken away every time I ride my horse in there.

In mid-October I traveled to the Missouri Breaks of north central Montana to hunt bighorn sheep in Area 680. One of the most coveted and hard to draw big game tags in North America, with draw odds exceeding 1 / 4,000. I hunted 16 consecutive days, accompanied by friends and family, passing up many great rams, looking for the "one". I harvested a beautiful 7 year old ram that green scores 190", with 16" bases and 41 3/8" horn length. The ram will easily make the all time B&C

record books after the 60 day drying period. I have dedicated much of my time personally and professionally, to benefit bighorn sheep, so this meant a lot to me. The Missouri Breaks is a rugged landscape and is some of the most incredible bighorn sheep habitat found in the Lower 48. Like many other places in the West, water appears to be a limiting factor in portions of the Breaks. I have made contact with Montana Fish, Wildlife, and Parks personnel to discuss how Water For Wildlife might partner with their agency in the future.

So now after a long and successful hunting season, it's back to work. I am working with your Executive Director, Erica Flom, reaching out to state wildlife agencies and conservation organizations in the western U.S., developing partnerships and identifying opportunities for water development projects that will positively impact wildlife in each state west of the Mississippi River. The Water For Wildlife Foundation has also changed the deadline for project application submission. Instead of reviewing applications twice annually (June and September), the board and I will only review applications once a year. Applications will be due January 31, with review and notice of funding approval by mid to late March. This new application deadline is more in line with the other conservation organizations and wildlife agency project funding application deadlines. We feel that we will be better able to fund "the best of the best" applications by reviewing and allocating once per year as well. The WFWF staff and myself will still provide project updates and notice of project funding decisions at the Foo Foo Rah and One Shot events annually, as well as in the Gazette.

I continue to be excited about the momentum the Water For Wildlife Foundation is gaining. We are making connections with individuals, agencies, and organizations that can lead to long term and mutually beneficial partnerships. As always, I am energized by the passion and enthusiasm that members of this organization show towards wildlife conservation. We are making positive things happen on the landscape for wildlife. That is exciting and something we can all be very proud of.

Til next time, your partner in conservation,

*Ryan Amundson*

Ryan Amundson  
WFW Game & Fish Statewide Habitat Biologist

## From the desk of Paul Fonatine Hunt Club President

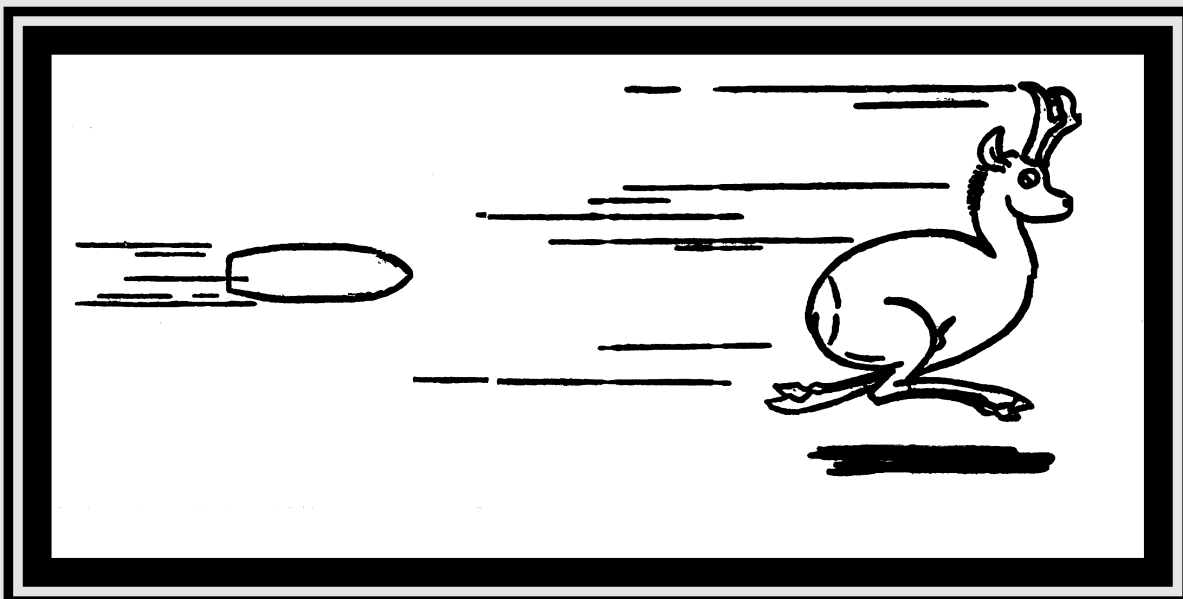

Season greetings,

With hunting seasons winding down I hope everyone has created new memories and full freezers. The One Shot Hunt Club board has been busy going over last years hunt and planning for the 2017 hunt. We had a great post hunt meeting with some Past Shooter and Water for Wildlife board members. The hunt club board and myself are looking forward to another great hunt in 2017 and are excited to see all of you in September. Best Wishes,

Paul Fontaine

*Paul Fontaine*

President  
One Shot Hunt Club

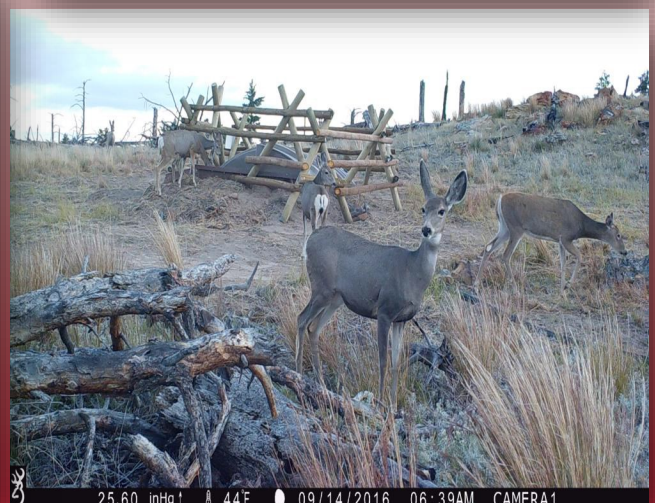

# Success story in every WFW Water Project

The number of species utilizing the new Elk Mountain water project in Southeastern Wyoming, is an indication of how much this water source was needed. Special thanks to Todd Caltrider, project manager, for sharing these trail cam photos and an update of the project, funded by a matching grant from WFWF.
